Abstract (en)

[origin: EP2584087A1] Machine for spreading out and loading flat clothing articles comprising a conveyor belt (30) and several pairs of clamps (4a,4b) moved along a guide rail (8) between positions adjacent to loading stations (1,2), wherein the pairs of clamps (4a,4b) receive contiguous corners of flat clothing articles (A1,A2) loaded manually by operators, and positions wherein the clamps (4a,4b) spread the flat clothing articles (A1,A2) with respect to a loading end (30a) of the conveyor belt (30). A protective cover (11) frontally covering the loading end (30a) has a pressing edge (12) and is moved between a position allowing the free passage of the flat clothing articles (A1,A2) between the pressing edge (12) and the frame (10) and a position wherein the flat clothing articles (A1,A2) are caught between the pressing edge (12) and the frame (10).
