Abstract (en)

[origin: EP2584089A1] The iron (1) has a sole plate (2) that is surmounted by a radiator and a case including a heel on which the iron rests at the time of inactive phases. A descaling opening (84) is placed in a recess (33A) that is placed on the case. A removable stopper is fixed by rotation on a fixing support surrounding the descaling opening. The removable stopper removably supports a trim piece (91) that is utilized to mask the recess.
