Abstract (en)
[origin: EP2584302A2] The box profile (1) has two side walls (6, 7) connected with a top wall (5) such that a collection chamber (9) is enclosed by the side and top walls, where the box profile is formed as a single-piece extruded section. The side walls and/or the top wall are formed with receiving openings (3) for receiving a connecting piece. Mounting holes (4) i.e. blind holes, are formed on the side walls and/or the top wall for positively or frictionally fastening an attaching element i.e. screw, of the connecting piece at the side walls or the top wall.
