Abstract (en)

[origin: WO2011160776A2] A symbol display element for a vehicle interior is disclosed, which comprises a front cover formed by a diffusion disk. A shadow mask is arranged in the light path between the diffusion disk and several individually activatable point light sources and comprises for each point light source an associated symbol that is projected in an enlarged form onto the rear face of the diffusion disk when the corresponding point light source is activated. Owing to this design of the display element, which is simple to implement, the various symbols share a common display surface on the diffusion disk, acting as a rear projection screen.
