Abstract (en)
[origin: WO2011162598A1] The invention relates to a combination of a control element, such as a push plate for controlling a build-in flushing reservoir, and an alcove, which alcove comprises a bottom wall, a rear wall and side walls extending at least between the bottom wall and rear wall, wherein the control element is arranged under and adjacently of the bottom wall of the alcove and wherein a service opening is arranged in the alcove to enable access to the rear side of the control element.
