Abstract (en)

[origin: WO2012001209A1] In accordance with an example embodiment a method and apparatus is provided. The method comprises receiving a composite image comprising a plurality of images. Further, the method comprises sending a request over a network for at least one individual image. Moreover, the method comprises receiving the at least one individual image. The apparatus comprises at least one processor and at least one memory. The memory comprises computer program code, the at least one memory and the computer program code configured to, with the at least one processor, cause the apparatus at least to perform receiving a composite image comprising a plurality of images; enabling selection of at least one individual image from the plurality of images; sending a request over a network for the at least one individual image; and receiving the at least one individual image.
