Abstract (en)

[origin: WO2011160700A1] The present invention relates to communication networks and, more particularly, to information playback in communication networks. System and method for enabling Video Cassette Recording controls while information is being played to a user. A Media Gateway Controller indicates to a Media Server that the user could exercise Video Cassette Recording controls on the information while the information is being played to the user. The Media Server plays the information to the user and receives a Video Cassette Recording control command entered by the user. The Media Server performs an action on the information according to the Video Cassette Recording control command. The user is an Intelligent Network Application Part (INAP)/Customized Applications for Mobile networks Enhanced Logic (CAMEL) user.
