Abstract (en)  
[origin: WO2012001603A1] The invention relates to a cooker hob device, in particular to an induction cooker hob device, which comprises at least one switching unit (28, 30) and at least one control device (14). In order to obtain a high degree of efficiency, according to the invention the control device (14), in at least one operating procedure, automatically initiates switching at least of the switching unit (28, 30), in at least one complete first time interval (t1) and using at least one switching parameter, the value (15) of which is at least substantially continuously changing.
