Abstract (en)
[origin: WO2011161251A1] The present invention relates to a device for generating a plasma jet from a carrier gas, comprising a discharge chamber having a longitudinal axis and an emission nozzle connected to said discharge chamber, said emission nozzle being provided with an outlet for emitting a generated plasma jet, said discharge chamber and said emission nozzle having a length that can be adjusted as a function of a preset output power of said plasma jet.
