Abstract (en)  
An electric cleaner includes an electric cleaner body with electric blower, and a dust chamber detachably mounted on the electric cleaner body. The dust chamber includes an actuator for vibrating the dust chamber, a driver for driving the actuator, a storage for supplying electric power to the driver, and a dust removal switch for electrically connecting the driver and the storage. The electric cleaner body includes a charger for charging the storage. The charger continuously charges the storage for a first predetermined time after starting the operation of the electric blower, and then intermittently charges the storage at least while the electric blower is stopped.
