Abstract (en)

The packaging machine for packing soft paste products comprises two parallel synchronously and continuously driven conveyor belts (1, 7) disposed in an horizontal fashion the one over the others ; product holders (5, 11) mounted on each said conveyor belts and uniformly distributed along the length of said conveyor belts ; said product holders (5, 11) having a cavity merging on their free end face ; said product holders being distributed along their respective conveyor belts so that at the front of the machine a product holder (5) of the upper conveyor belt (1) comes near a product holder (11) of the lower conveyor belt (7), their cavities (6, 12) matching to form a mould ; said corresponding product holders (5, 11) separating at the downstream end at the conveyor belts (1, 7).
