Abstract (en)  
The present invention relates to a laundry rack (10) for a drum of a laundry dryer. The laundry rack (10) includes a cage (12) and an elongated handle (14). The cage (12) comprises a bottom (16), two opposing side walls (18), an open front side and an open top side. The bottom (16) and the side walls (18) are at least partially formed as grids. The handle (14) is tiltable at the cage (12) between a gripping position and a supporting position. The handle (14) extends upwardly in the gripping position, so that the handle (14) forms a handhold for the laundry rack (10). The handle (14) lies on the bottom (16) of the cage (12) in the supporting position, so that the handle (14) closes at partially the open front side of the cage (12).
