Abstract (en)

[origin: EP2586916A1] The tool has a frame on which a cabin front portion, a rear tank portion, a suction unit and a brush unit (1) are arranged. The brush unit is arranged on a carrier plate (2), and a peripheral skirt (13) is provided at a base of the carrier plate. The peripheral skirt covers a space existing between lower edge of the carrier plate and the ground. The suction unit comprises a suction nozzle that is connected to the carrier plate above the brush unit to generate air flow directly through the brush unit.
