Abstract (en)

[origin: EP2586928A2] The holder (1) has a fortified wall side, stationary support angle (8) comprising a set of vertical legs (10, 11) that forms a half of a receiving openings for wedging support of upper and lower material plates (29, 30). Another set of vertical legs (13, 21) forms another half of the receiving openings. The latter half of the receiving openings is formed as an engaging angle (20) for engaging a bottom surface of one of the vertical legs of the latter set, where the engaging angle is put and locked into the support angle. A module aperture (24) is formed in the support angle. The upper and lower material plates are designed as a toughened safety glass panel and a laminated safety glass panel, respectively.
