Abstract (en)
[origin: EP2586934A1] The device i.e. sprinkler connection box (1), has a connection piece (2) made of metallic material e.g. brass or red bronze, and a housing (3) including a fastener (4) i.e. pin, which enables positioning and fastening on a surface. A sealing stopper (5) enables leakage tests and is made of plastic. The piece, the housing, the fastener, the stopper and a transfer piece are premounted. The box is connected with a sprinkler line and fastened to a formwork plate. The stopper includes a stage (9) sealed with a bevel (10) in the connection piece in a screwed-in condition. An independent claim is also included for a method for attaching connection of a sprinkler in a ceiling.
