Abstract (en)
[origin: EP2587137A1] [Object] To reduce manufacturing and management costs to provide inexpensive illumination device and illumination fixture.
[Means for Settlement] Since a first terminal part 321 electrically connected to an anode side of LED light sources 31 is different from a second terminal part 322 electrically connected to a cathode side of the LED light sources 31, wrong connection at assembling can be prevented. Thereby, since the type of LED units 30 can be made uniform, manufacturing and management costs of an illumination device 30 and an illumination fixture 10 can be reduced.
