Abstract (en)

[origin: WO2012001461A1] The present invention pertains to a method of drying a bale (18) of compressed harvested material, e.g. bales of hay, straw and the like. The method comprises the steps of generating a plurality of channels (152) within the bale (18) and injecting a gas (154) into said plurality of channels (194). The present invention also pertains to a bale drying facility (100), a self- contained drying module (118) for use in such a facility (100), and a software program for controlling the execution of the steps of the method.
