Abstract (en)

[origin: WO2012000949A1] The invention relates to a method for compiling a software application to be executed on a virtual machine of a physical platform, said software application originally being in the form of a set of codes to be compiled. According to the invention, such a method includes a phase of selectively compiling said set of codes to be compiled, outputting a compiled application including a first application part which is executed by said virtual machine using commands from said virtual machine, and a second application part including binary commands which can be executed directly on said physical platform.
