Abstract (en)

[origin: WO2011151539A1] The invention relates to a keying system for an aerophone and to an aerophone including such a keying system. The invention applies specifically to wind instruments of the woodwind family, either classical, traditional or ethnic, which include a body (140) extending axially between a mouthpiece (110) and an end (130) and are drilled with radial apertures, said keying device including keys for controlling the closing of the radial apertures positioned in contiguous pairs, which are themselves positioned in mutually contiguous fashion.
