Abstract (en)
[origin: WO2012001159A1] A rotary selector switch (100) comprises a first switching contact (110), which is opened in an off angle range and is closed outside the off angle range, in particular for switching an electrical load on and off, a coding device (120) which produces an angle-dependent code over a predetermined angle range, and a second switching contact (130), which is closed in a plurality of starting angle ranges and is opened outside the starting angle ranges.
