Abstract (en)

A display stand with shelves, foldable from a flat transport configuration to a working configuration, in which it has a form of a box with side walls (120, 130), a back wall (110) and shelves (140). The main plane of the shelves (140) is formed by at least two layers (141, 142) of cardboard, between which there are placed base portions (151) of first attachment elements (150), the first attachment elements (150) having attachment portions (152) which extend from the side edges (143) of the shelves via openings (144) made near the side edges (143) of the shelves. The main plane of the side walls (120, 130) is formed by at least two layers (121, 122) of cardboard, between which there are placed base portions (161) of second attachment elements (160), the second attachment elements (160) having attachment portions (162) which extend from the internal surface of the side wall (120, 130) via openings (123) made in the internal layer (121) of the side wall (120, 130). The shelves are permanently and pivotably fixed to the back wall (110) and are detachably mountable to the side walls (120, 130) by the attachment elements (150, 160) when the stand is folded to the working configuration.
