Abstract (en)

[origin: EP2589725A2] The profile (10) has a fastening bracket (12) connected to a building section, and a connection bracket (16) connected with a ventilation profile. The connection bracket has coupling sections (18) that are arranged at a distance from each other in a longitudinal section (x), where coupling positions (22) are defined in each coupling section. The coupling bracket is coupled with a connection unit e.g. screw or connector, for the ventilation profile in the coupling positions. The fastening bracket has a hole (14) with a round cross-section and/or a longitudinal hole. Independent claims are also included for the following: (1) a system for fastening a ventilation profile to a building section (2) a connection element for connecting a ventilation profile to a building section.
