Abstract (en)
[origin: EP2589875A1] An injection apparatus (10) is provided and includes an annular base (20) defining an injection hole location (200) and having a protrusion (25) about the injection hole location (200) and a tubular body (40) formed to define an injection hole (401), the tubular body (40) to be sealably fastened to the annular base (20) and the protrusion (25) at the injection hole location (200) such that the tubular body (40) and the protrusion (25) cooperatively define a plenum (50) such that the plenum (50) is communicative with the injection hole (401).
