Abstract (en)  
An object of the present invention is to prevent wires drawn out from a housing from being bent at angles larger than specified angles. A wire cover 60 includes a first part 61 which is attached to a housing 30, extends backward from a rear side of the housing 30 while being narrowed and in which respective wires 100 are accommodated while being bent with respect to the rear side of the housing 30, and a second part 62 which extends backward from the rear end of the first part 61 and in which the respective wires 100 are accommodated while extending substantially straight. A banding band 90 for banding and fixing the respective wires 100 accommodated in the second part 62 is mounted on the second part 62.
