Abstract (en)
[origin: EP2590473A1] The device has heating unit, a control unit and sensor unit. The control unit is provided for detecting the imminent simmering state of food to be cooked by the heating unit, based on the time profile of a signal measured by the sensor unit. An acceleration sensor is provided in the sensor unit. A position determination of heated cooking material is performed based on corresponding signal strength of the signals. An independent claim is included for cooking method using cooking device.
