Abstract (en)

[origin: EP2590476A1] The home appliance (10) has two load units (34, 36) such as heating units which are connected to two rectifier units (20,22) respectively. A switching unit (60) is provided between the load units and rectifier units, for simultaneously switching the connection between the load units and rectifier units during two different modes. A control unit (70) is arranged to control the switching operation of switching unit so as to control power consumption of load units. An independent claim is included for method for operating home appliance.
