Abstract (en)
[origin: WO2012004152A2] The invention relates to a container for refrigerated products for a refrigerator, in particular a domestic refrigerator, having a shell body (1) which has a front wall (3) which is secured in a releasable manner to the shell body (1). The container for refrigerated products has at least one operating element (5) which can be operated by a user without tools. The operating element (5) can be adjusted, in particular by a lifting movement (?h), between a lock position, in which the front wall (3) is secured to the shell body (1) such that it cannot be released, and a release position, in which the front wall (3) can be removed from the shell body (1).
