Abstract (en)

[origin: EP2591861A1] An actuator cap (1) for dispensing a fluid product, comprising a rotatable outer body (2) and an associated actuator button (3), the outer body (2) enclosing a non-rotatable chassis (4) and an associated spray channel assembly (6), the latter comprising an outlet nozzle (63); the outer body (2) and actuator button (3) being rotatable between: a first position in which the actuator button (3) is non-elevated, the actuator button (3) being incapable of depression in this position and a second position in which the actuator button (3) is elevated, the actuator button (3) being capable of depression in this position; rotation of the outer body (2) causing the actuator button (3) to rotate and to rise or fall, dependent upon the direction of rotation, and depression of the actuator button (3) causing release of fluid product from an associated container through the spray channel assembly (6).
