Abstract (en)

[origin: EP2592213A2] The tape (1) has a carrier tape designed as a flat tape (2) and made from textile or plastic. Clip fastening elements (3) made from plastic are welded to the carrier tape. The fastening elements comprise a locking groove on a broadside of the carrier tape, where the groove is provided for a lamella-sided clip pin. A flexible cord (4) is arranged between the fastening elements, and overlaps a middle section of the carrier tape between the fastening elements. The cord is curved to a bulge in a load-free condition of the tape, where the bulge is aligned towards a broadside of the groove. The cord is made from elastomer plastic or sprayable plastic. An independent claim is also included for a venetian blind.
