Abstract (en)  
[origin: EP2592371A2] A cooling appliance is provided, which includes a heat-insulating housing (2) having a heat-insulating layer; a receiving member (3) embedded in the heat-insulating layer, where the receiving member (3) has a receiving space (33) and a insertion hole (34); and an electrical connector (17), inserting through the insertion hole (34) and extending into the receiving space (33). According to the present invention, the electrical connector (17) is fixed in the receiving member (3).
