Abstract (en)

[origin: EP2592687A1] The module (2) has lower assembly which is fixable on upper assembly (1) and is provided with a circuit board (21). The electrical contact units (11,22) are arranged on assemblies and are provided with antenna contact. A lower contact unit is displaceable in a plane lying parallel to a vehicle frame portion (4) from an upper position in a displacement direction linearly into a lower position, when the lower assembly is fixed. The contact units are electrically disconnected and connected from one another in the upper and lower positions respectively.
