Abstract (en)
[origin: EP2592906A1] The operation unit (10) has control elements (20A) that adjusts size of light field formed by light at predetermined location. An electronic interface outputs control signals for size of light field to a control device of the lamp, and screen (12) displays the currently selected size of light field. The size of the light field is adjusted by control element to change the shape of corresponding light beam (28) in the form of light cone in the representation (22) on the screen during the operation of lamp.
