Abstract (en)

[origin: WO2012007314A2] The invention relates to a refrigerator, in particular a domestic refrigerator, comprising at least one storage tray (3) which is mounted on a pivot arm (8) that is articulated on a first shaft (A1), which is rigid with the housing, the pivot arm (8) being articulated on the storage tray (3) on a second shaft (A2) which is parallel to the first shaft (A1) that is rigid with the housing in such a way that the storage tray (3) can be vertically adjusted between a high position (I) and a low position (II) along a substantially circular movement path (B) which is delimited by movement stops (20a, 20b). According to the invention, the movement stops (20a, 20b) are formed as stop sections directly on the pivot arm (8) and can be moved into abutment with a corresponding counter contour on the storage tray (3).
