Abstract (en)  
[origin: WO2012009528A1] Embodiments of the invention relate to a biolaminate composite assembly, including one or more biolaminate layers, a non-plastic rigid substrate and an adhesive layer in contact with the substrate and the one or more biolaminate layers. The substrate is laminated or formed to the one or more biolaminate layers. Embodiments also relate to methods of making a biolaminate composite assembly.
