Abstract (en)
[origin: WO2012008848A1] A system and a method for positioning a structure (1), floating in a body of water, at a desired position (P) comprises at least two anchors (7, 8; 1e, 1f) positioned on the seabed. Each anchor comprises respective connection lines (2, 3) for attachment to the structure, and a tug (5) connected to the structure. Each connection line (2, 3) comprises individual adjustment means (15). The length of the individual positioning lines may be adjusted individually and selectively during the positioning.
