Abstract (en)
[origin: WO2012007112A1] The present invention relates to a winch, in particular a retracting winch, having a winch drum (30), at least one main drive (10), which drives the gear-mechanism input shaft (35) of the winch drum, and at least one emergency drive (20), which drives the gear-mechanism input shaft in the event of an emergency, wherein at least one emergency drive can be coupled, if required, to the output wheel (70) of the gear-mechanism input shaft via at least one intermediate wheel (100). The present invention is also directed to a piece of building machinery or to a hoist having at least one such winch.
