Abstract (en)
[origin: WO2012156035A2] The invention relates to a multichannel evaporator system comprising at least one multichannel evaporator that has a plurality of channels through which refrigerant flows during operation of the multichannel evaporator. The multichannel evaporator is bent in at least some areas, and at least one fan is provided which is arranged in such a way as to also or exclusively move air in the radial direction over the bent multichannel evaporator.
