Abstract (en)

[origin: EP2410317A1] The particles (3) are transferred from tablet (1) to test portion (2) by electrostatic potential difference between them and the transferred particles are measured. The color of test portion is different from the color of tablet. The test portion is made of plastic, rubber or natural rubber. The surface of test portion is coated with adhesive. An independent claim is included for device for measuring particles adhering to portion.
