Abstract (en)

[origin: WO2012007447A1] The invention relates to a switchgear for an interrupter tube for contact electrodes (1, 2), comprising openings (47, 48) in the collars (31, 32) of an electrode centering hood (29), in order to break the confinement of the electrodes and to enable the ventilation thereof by convection of gas between the interior space (57) heated by the current and the cooler exterior space.
