Abstract (en)

Method for depositing a relatively small amount of semi-solid lip product (8) which is meltable by heat and which is non flowable at room temperature, comprising a thin flexible sheet-like support (1) with a lip product area (4), comprising an interconnected open channel structure therein, which is formed by channel forming elements (6), like for example small projections and/or cutouts, at least comprising the steps of - depositing the necessary amount of lip product in the lip product area (4), the circumference of which comprises a raised edge (7) accurately delimiting said area (4), having such dimensions that it can at least accommodate the intended thickness of the lip product (8) to be deposited, - subjecting the the lip product (8) to a heat treatment, such that all of the lip product (8) is heated to above the melting point thereof. - cooling the assembly of applicator and lip product (8).
