Abstract (en)

The invention relates to a labelling machine (1) for applying labels on respective items, in particular containers or the like, comprising a carousel (2) rotating about a first vertical axis (A) and peripherally bearing a plurality of items, and a labelling station (7) arranged peripherally with respect to the carousel (2) and adapted to feed labels to the carousel (2); the machine (1) also comprises: constraint hinge means (10) arranged at the periphery of the carousel (2) and connecting the labelling station (7) to the carousel (2) in an orientable manner about a second axis (B) parallel to said first axis (A); and fastening means (11) of the labelling station (7) to the ground in a predetermined position with respect to the carousel (2), these fastening means (11) are arranged at a predetermined distance other than zero from the periphery of the carousel (2).
