Abstract (en)
[origin: EP2594703A2] The groove-comb connection structure includes a comb (2) which is made of an element-side region (2a) with parallel surfaces and rounded off region (2c). A diameter-tapering region (2b) is provided between the element-side region and the rounded off region. The diameter-tapering region is provided with converging inclined surfaces. The element-side region, diameter-tapering region and rounded off region are merged into one another seamlessly, corresponding to the shape of a groove (3). Independent claims are included for the following: (1) plate-like element; (2) method for manufacturing plate-like element; (3) use of plate-like element; (4) building incorporating plate-like element; and (5) method for construction of building.
