Abstract (en)

[origin: EP2594722A1] The plug connector (1) has a base portion (2) and two long side edges (3,4). Two rising legs (5,6) are formed on the base portion. The base portion is joined together with the long side edges that are protruded outward. The resilient deformable slats (7) are arranged for plug-in portion and are bent or flexed at the long side edges along rear insertion direction. The retaining and compensating elements (12) are arranged in the region of the rising legs and are projected vertically to the base portion.
