Abstract (en)

[origin: EP2594724A1] The door (1) or window has a blind frame (8) anchored at a building part. A strip (15) with a longitudinal axis extends in a direction of a fold (13). A cross-section of the strip aligned vertical to the fold is elongated, and a filling element is aligned with a longitudinal axis vertical to a plane. The strip with an anchoring portion is inserted into an adjustable anchorage groove (28) in a leaf frame leg or a blind frame leg. An idle portion (29) is engaged into a fold groove (30) in an opposite blind frame leg and/or a leaf frame leg. The strip is arranged in a region of a lock.
