Abstract (en)

The present invention is directed to a self-defense system comprising a fog generator for generating fog inside an area, an activation switch, and a fog generation control unit for operating said fog generator in response to activation of the activation switch, characterized in that said system further comprises means for personalizing the fog generator via internet. Additionally, the present invention is directed to a kit of parts for a self-defense system comprising a fog generator for generating fog inside an area, an activation switch, a fog generation control unit for operating said fog generator in response to activation of the activation switch, and means for personalizing the fog generator via internet.
