Abstract (en)

[origin: WO2012010756A1] The invention relates to a tray for transporting and displaying items such as cups of yogurt. The tray includes a bottom wall (1), sidewalls (2, 3, 4, 5) perpendicular to the bottom (1), and side flaps (27) enabling the attachment of a first wall (2, 4) to the wall (3, 5) adjacent thereto, each flap being pivotably connected to the side edge of the first wall (2, 4) and attached to the following wall (3, 5). According to the invention, the side flap (27) is pivotably connected to the first wall (2, 4) via a triangular interface area (16), the tip (17) of which points toward the free upper edge (31, 32) of the two consecutive sidewalls (2, 3, 4, 5), and the base (18) of which rests on the bottom wall (1), wherein said triangular interface area (16) is angled, from the base (18) thereof to the tip (17) thereof, toward the outside of the outline defined by the bottom wall (1). The invention can be used for trays for transporting products such as cups of yogurt.
