Abstract (en)  
[origin: WO2011140587A1] A display unit for displaying and/or dispensing items, including a sleeve part (8) and a container part (13), wherein said sleeve part is slidably mountable over the container part, and is slideable relative to said container part from a first pre-assembled condition to a second assembled condition, and wherein to form said second assembled condition, sections of said sleeve part are folded about fold lines (A to G) to define at least one protruding foot portion (42), wherein said fold lines cause at least one surface of said protruding foot portion to form a compound curved, non-planar surface which imparts rigidity to said unit when in said second assembled condition.
