Abstract (en)

[origin: WO2012011007A1] The invention relates to a door of a front-loading washing machine comprising a door frame 2, a concave element 3 with an edge 31 connected with the door frame, and a lenticular element 4 that closes the concavity formed by the concave element forming a hollow 5 in the door 1. The door frame 2, the concave element 3 and the lenticular element 4 are made as a single piece of plastic injected by means of a gas injection process.
