Abstract (en)

[origin: WO2012010425A1] The invention relates to a water-bearing household appliance (1), serving in particular as a laundry treating device for washing and/or drying laundry, comprising a housing (2), a treatment area (7) disposed in the housing (2), and a container (14) for receiving a treatment agent. The container (14) is at least partially arranged in an intermediate space (11) provided in the housing (2) and provided between the treatment area (7) and an upper face (10) of the housing (2). The intermediate space (11) can be used advantageously for storing the laundry treatment agent or an additional reserve of the laundry treatment agent.
