Abstract (en)

[origin: WO2012010622A1] The invention relates to a money-operated machine, including a housing made from an extruded profile (1) and comprising a compartment that houses a money acceptor and a compartment that houses a money box in communication with the money acceptor. According to the invention, in order to protect the collected money, the money box is housed in a strongbox consisting of metal sheets (10, 11, 12, 13), which are nested within one another by means of serrations (15, 16) cut out on the edges of the metal sheets, and is attached to the extruded profile (1) by means of the cut-out serrations (15, 16) being inserted into grooves or notches (3, 5) of the extruded profile (1) acting as guides.
